

# Changelog – August 2019

## Release notes

- IMDEXHUB-IQ: Two major changes have been made that affect user authentication and change the user experience when navigating between pages - JWT Refresh Tokens and Client-Side Routing.
- IMDEXHUB-IQ: Some changes to column names, which will affect stored filters. These changes are:
  - TN-14 - Planned Azimuth Column to become Planned TN Azimuth
  - TN-14 - Target Mine Azimuth column to be renamed Planned Mine Azimuth
  - TN 14 - Target Dip and Azimuth Flag renamed to Planned Dip and Azimuth
- IMDEXHUB-IQ: TN-14 - Actual Azimuth only shows data to 1 decimal place has been resolved.
- IMDEXHUB-IQ: TN-14 Approve - Planned Azimuth QA Flag fails inconsistently has been resolved.
- IMDEXHUB-IQ: An issue affecting users for Target Drill hole Coordinates in Plan Drill holes - cant enter a negative Z value has been resolved.
- IMDEXHUB-IQ: User with Submit Ez-Gamma only are being prompted for password resets has been resolved.
- IMDEXHUB-IQ: The Integration API returns a Status of 1 for Sprint-IQ instead of "Approved" has been resolved.
- IMDEXHUB-IQ: IQ Logger Approve - Incorrect Hole Dip is Displayed
- IMDEXHUB-IQ: Manage Integrations - Once an integration key has been created the details are not able to be edited
- IMDEXHUB-IQ: Other miscellaneous bug fixes.
- IMDEX MOBILE: Add Rate items - The validation is preventing the user from creating valid Rate items has been resolved
- IMDEX MOBILE: Web Approvals and Minor Versioning - Error occurs if you have sessions to approve with older version has been resolved.
- IMDEX MOBILE: Edit Rate Items - Range Calculation reverts to 'Normal' when you edit a rate item with 'Cumulative Over Shift' selected has been resolved.
- IMDEX MOBILE: Updates to IMDEX Standard Vehicle and Equipment Prestart
- IMDEX Mobile: Other miscellaneous bug fixes.
