Changelog – February 2019

Release notes

- Manager Users - Copy user should now work even when users are off the current grid page.
- Sharing - SPRINT-IQ data is no longer shared when an EZ-GYRO share is setup.
- Sharing - Users can no longer delete shared drillholes.
- Notifications - Emails are now sent asynchronously from the workflow step that creates the email such as Create Project. This now speeds up the IMDEXHUB-IQ workflow as the user is now not waiting on emails to be sent before being able to proceed to the next step.
