

Changelog – January 2019

Release notes

- View Data – A bug in "Export All" in View Data no longer has a link that returns a 404 error (not Found).
- Sharing - Users should now be able to bulk share projects.
- API Integrations - The Survey and Structural API's no longer return an unnecessary DateCreated parameter.
- Approve - Users should no longer be able to approve EZ-TRAC readings at the same depth.
- Plan Drillholes - Users can now delete multiple drillholes as long as the following criteria are met:
 - Not shared
 - Not completed and
 - Has no data assigned
- Integration API - Operations have been better documented in API Developer Portal
- IQ-LOGGER – In Approve and View "No Line" Core alignment that is being sent from the application is supported.
- ACT III – All references to ACT III in Approve and View have been changed to ACT-IQ
