

## Release Notes – March 2019

### IMDEX Mobile

- New Web Approval ability to Approve or Reject Daily Drill sessions from HUB-IQ for Client Signoff
- New form 'IMDEX – Daily Drill Report [DD & RC] Web Approval' is now available from Manage Mobile Devices.
- Web Approvals has Project based permissions, user can only view sessions they have access to.
- Reporting permissions - Manage Reports ability to manage reports permissions for each user which means that users will only see the reports they have access to.
- Reporting permission - Generate Reports has added project permissions filtering to all reports so users can only select and view report data from Projects they have access to.
- In View Forms added ability to view the history for each form submission by clicking on the 'Workflow Status' hyperlink.
- Manage Mobile Form Versions: ability to control major form version releases so when a new form version becomes available you can now manage when it will be used by each device.
- In Schedule Management all schedules that have been superseded but are still reported on are now visible. You will now be able to amend these schedules to Edit/Remove/Add rate items.
- In Schedule Management a Project is now required when creating a schedule.
- New Mobile Forms are available these include
  - IMDEX – Daily Drill Report [DD & RC] v2.1 Updates
    - The Drilling section now includes an azimuth and comments field for data capture
    - We've increase the number of entries for the Equipment section to 8 entries
    - The 'Select X if Non-Chargeable' will now only be visible if the item is chargeable
    - The Bit Numbers will now be filtered on the form based on the rig type (DD/RC). This is managed in the 'Drill Bit Information' list in HUB-IQ by assigning the Rig Type to each Bit Number.
  - New IMDEX – Daily Drill Report [DD & RC] Web Approval v1.0
    - This form is the same as the 'IMDEX – Daily Drill Report [DD & RC]' but instead of the Supervisor sending the session to the Client the session will now be available to Reject or Approve from IMDEXHUB-IQ.
- Resolved fix in view forms for filtering of sessions
- Resolved fix in view forms for the value in the Form name is now visible in the grid
